1 Plotting assignment

1.1 Prey and Predator

In this assignment we have created a plot showing the interaction of prey and predator. The plot is shown using for different file formats:

- In Figure 1 the plot is show using a `.png` file.
- In Figure 2 the plot is show using an `.jpeg` file.
- In Figure 3 the plot is show using a `.pdf` file.
- In Figure 4 the plot is show using a `.eps` file.

We find that... Hmmm..., very interesting. Peculiar, perchance...

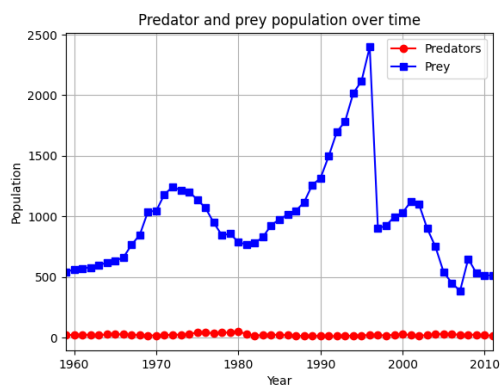

Figure 1: A plot describing the population evolution of prey and predators. The plot was saved in png format

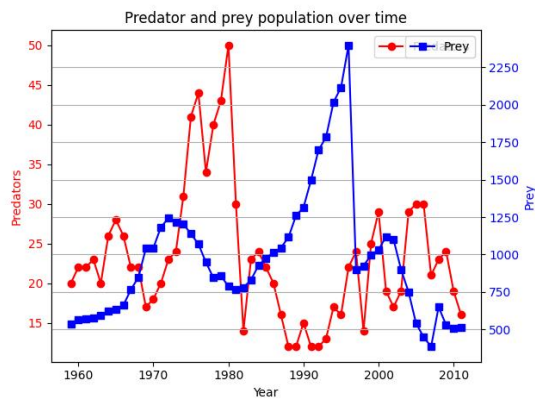

Figure 2: A plot describing the population evolution of prey and predators. The plot was saved in jpeg format

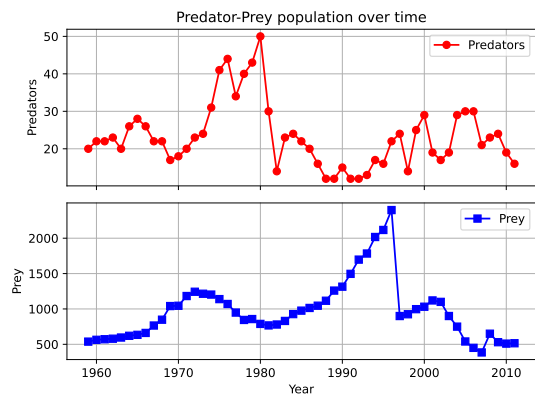

Figure 3: A plot describing the population evolution of prey and predators. The plot was saved in pdf format

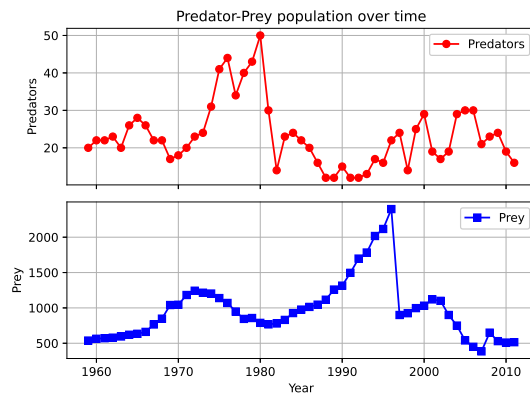

Figure 4: A plot describing the population evolution of prey and predators. The plot was saved in eps format

1.2 Data rates

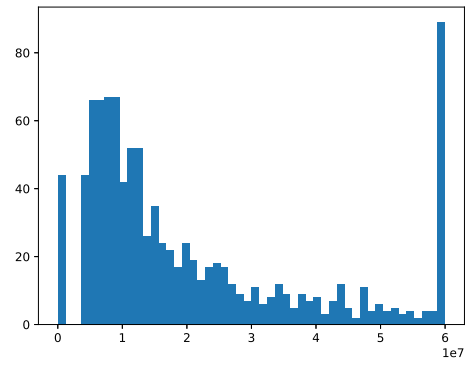

Figure 5: Histogram showing number of people with a certain coverage.
